

## Thank you for choosing The3DPC!

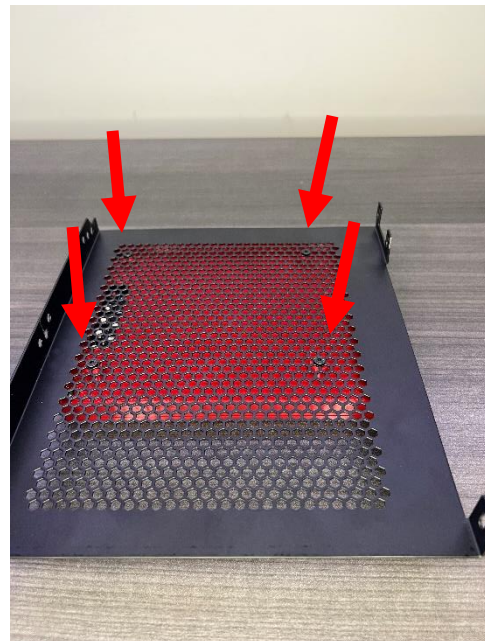

Velkase 7" LCD Side panel case

Tools needed: M3 Allen wrench and Phillips screwdriver

- 1) Begin by removing the front and the motherboard side panel from the case. (use the Velkase assembly manual)
- 2) Take the LCD panel Base and set the LCD panel inside with the IO matching the IO cutouts in the base.

- 3) Mount the LCD panel surround on top of the LCD panel and turn whole case over. Insert the included four M3x12mm screws to the 4 outermost holes (not the threaded inserts) and tighten down. **DO NOT OVER TIGHTEN!**
- 4) Next, attach the LCD panel to the motherboard side panel. The IO panel should be facing the back of the case. Pick where you would like it mounted. Use the included four M3 x 5mm countersunk screws. **DO NOT OVER TIGHTEN!**

- 5) Install the side panel and front panel per the Velkase assembly manual. Attach your video cable and USB power cable. You now have a full mobile PC.
